EXPERIENCE

| FREELANCE DEVELOPER

Delhi, India | Oct 2021 – Now

- I worked on lot of stuff which varied from making websites for small restaurants to making animations to add in the a existing animation or just a telegram bot to automate process.
- Generally Javascript and Sass were the preferred technologies, but in the end it was upto clients.

SKILLS

PROGRAMMING LANGUAGES	Javascript, Typescript, Golang, Python, Lua, Sass/CSS/HTML
LIBRARIES/Frameworks	React / Next.js, Mongoose, Express.js, Node, Fiber
TOOLS / PLATFORMS	Linux, Git, Vim
DATABASES	Mongodb, Sqlite3, Postgres

PROJECTS / OPEN-SOURCE

VIMGORE | [LINK](#)

Javascript, Node, MongoDB, Express, React/Next.js

This a interactive site which helps you learn/get familiar with vim. The aim was to provide random code snippets that need to be corrected. This really helped me learn things lot about express, mongodb, deploying code and managing database

MKD-EDITOR | [LINK](#)

Typescript, Next.js, Tailwind

A browser based markdown editor, Helps me to write and review markdown for anything quickly. I made this one just recently and my attempt was to make this in a single day (which I totally did btw). This also helped me to learn about github actions.

TNEWS-BOT | [LINK](#)

Python

Telegram news bot that provides you the latest headlines. You can also search for news category wise or by names. I wanted to work with telegram api and also wanted to see experience with python.

DDOS-D | [LINK](#)

Lua, Love2d

This was a game I made for code-jam. I used lua for making this game. I think lua and love2d make a great combo to make games. The Idea of game was to teach people more about logic gates. I didn't win the jam but it was fun.

EDUCATION

S. L. SURI D.A.V PUBLIC SCHOOL

12TH BOARD

Percentile: 87%

Feb 2020 - July 2021

New Delhi, India
