Professional Summary

Full-stack Software Engineer with 4+ years of experience designing and scaling SaaS products from 0-to-1 and 1- to-N in startup environments. Led engineering across backend microservice and monolithic architectures, LLM pipelines, frontend codebases, and cloud infrastructure, consistently owning full delivery in fast-moving startup environments.

Experience

Senior Software Engineer | [Codeword](#)

Nov 2021 – Present | Gurugram, India

Served as primary engineer on multiple tools, owning full-stack architecture and delivery end-to-end while collaborating with and guiding a team of up to 3 developers.

[Thirdeye](#)

LLM-driven platform monitoring brand visibility across AI assistants and large language models.

- Architected the platform end-to-end, including multiple backend microservices and customer-facing Next.js UI
- Engineered automated prompt simulation pipelines to monitor brand presence handling 10K+ LLM calls/month.
- Architected a Tinybird + PostgreSQL analytics backend powering real-time brand visibility dashboards tracking mentions, sentiment, competitor share, and LLM rankings across 1,000+ customer accounts.
- Launched a whitelabel architecture enabling agencies to deploy customized Thirdeye instances for ex. [aimplify.com](#)
- Reduced LLM inference costs by ~35% by using tiered model routing and implementing context optimizations

[Macrostack](#)

Multi-channel marketing automation platform for ecommerce brands.

- Designed backend APIs and React based frontend for campaign orchestration, analytics, and reporting serving 100+ customers across 5 marketing channels.
- Unified 5 marketing channels like Meta Ads, Google Ads, WhatsApp, SMS & Email system into a monolithic API layer.
- Delivered a multi-tenant RBAC system and JWT-based authentication, supporting isolated data access across organisations.
- Architected async analytics ingestion pipelines using BullMQ and Tinybird receiving 2K requests / day

[Spotbeam](#)

Platform for managing Google Business storefront engagement and automation.

- Integrated Google Business APIs for post scheduling, review management, and location management
- Built AI auto-reply system for automated and context-aware customer review responses scalable to ~10K reviews/day
- Designed scheduling system for automated Google Business posts supporting automation for ~100K posts/day
- Worked on spotbeam mobile app, developing a full business analytics insight dashboard for users

Contract Fullstack Engineer | [Crepdog Crew](#)

Contract | Remote

- Built internal sneaker verification portal used by ops teams to automate product verification pipeline saving ~2 hrs/req
- Delivered an end-to-end portal using Express, Next.js & Postgres, while setting up CI/CD using AWS Amplify

Contract Fullstack Engineer | [Pharmint](#)

Contract | Remote

- Built internal dashboards for product search, demand analytics, and vendor price aggregation on 75K+ products
- Implemented backend services for medicine cost calculations using MariaDB, MongoDB, and Postgres
- Managed deployments and backend infrastructure on multiple AWS EC2 instances

Shopify Liquid Developer | [CTA India](#)

Freelance | Remote

Worked in maintaining themes for multiple brands like [evemen.com](#), [farak.co](#), [2112.co.in](#) and more. Built custom Shopify themes, Liquid extensions and storefront features during high traffic sale phases.

Technical Skills

Languages: TypeScript, JavaScript, Python, Go, Shopify Liquid

Frontend: React, NextJS, React Native

Backend: Node.js, GraphQL, NestJs, Express, REST APIs, Prisma, TypeORM, Go Fiber, Flask

Databases: PostgreSQL, Redis, MongoDB, MariaDB, Clickhouse, AWS RDS

Infrastructure: AWS (EC2, Lambda, S3, RDS, Lightsail, Cloudwatch), Vercel, DigitalOcean

CI/CD & Testing: Github Actions, Vitest, Playwright, Cypress, Docker

Education

Bachelor of Computer Applications (BCA)

IGNOU, New Delhi
